ENGINEERINGCONNECT

EngineeringConnect Industry Summit - Spring, 2017

Call for an Executive Team to take ideas generated from the Summits and create a plan of action between Summits. Bob Gnuse is heading this, already has 4 members.

Major discussions on student retention. Each table group asked to generate 3 ideas as to why we see a systemic low student retention (students not taking second PTLW course). Ideas will be discussed/mulled over by the new Executive Team.

Call to identify competencies for each PLTW course and students know their engineering opportunities depending on school choice.
